MEMORANDUM

July 10, 2019

TO: Reclamation District No. 2028

FROM: Nathan Hershey, Mike Kynett

SUBJECT: **July 2019 Engineer's Report**

Described below are the engineering items to be discussed at your July 10, 2019 meeting.

Subventions 2016-17 – The District submitted an application for participation in the Program in the amount of \$396,000. \$12 million has been approved for Program funding for FY 2016-17. The District submitted a final claim in the amount of \$320,706.82. We have been notified that CDFW has approved the release of funds for FY 2016-17.

Subventions 2017-18 – The District submitted an application for participation in the Program in the amount of \$565,000. \$14.5 million has been approved for Program funding for FY 2017-18. The District's final claim has been submitted in the amount of \$315,922.67.

Subventions 2018-19 – The District submitted an application for participation in the Program in the amount of \$500,000. \$12 million has been approved for Program funding for FY 2018-19, consistent with recent previous years.

Subventions 2019-20 – The District submitted an application for participation in the Program in the amount of \$615,000. DWR has lowered the Program funding amount to \$10 million for FY 2018-19. We believe \$10 million is likely not sufficient to fully fund the Program and have expressed our concerns to DWR and the Central Valley Flood Protection Board.

Annual Maintenance – Attached are the current maintenance items we are tracking.

Special Projects – Construction of the Old River multi-benefit levee rehabilitation project has restarted with Teichert mobilizing to the site on May 1, 2019. Teichert has completed trenching the levee crest, dewatering the on-island borrow site, stripping peat from the borrow site, and has begun placing both on-island borrow and imported material on the levee slope. Approval of off-site import material sources required additional quality control measures to ensure material which meets project requirements. We have been coordinating with Teichert, the District, and D&L Farms on dust control, access, haul truck speed, and the schedule of construction activities including siphon/pipe replacement. Details of siphon replacement is still being worked on between MBK and Teichert to ensure proper location and sizing of the pipes. The project is on schedule and the levee rehabilitation component will be complete by the end of 2019.

We have submitted a Full Proposal for a Directed Action project to rehabilitate the north and south levees. DWR is currently reviewing the proposal and has indicated that sufficient funding for the project may not be available at this time.

Five Year Plan – We have received a fully executed funding agreement for the Five-Year Plan (FYP). We have started work on the Plan update and have received an advance of funds in the amount of \$26,250.00.

SB 88 – Work under Phase 2 of the measurement experiment (work plan for 2019) is progressing and coordination with the Delta Measurement Experimentation Consortium continues. Eight of the nine existing test sites appear to be functioning properly and collecting flow data.

Siphon logs for calendar year 2018 have been summarized and were used for water right reporting calculations. 2019 siphon logs have been received for the month of May and collection of June logs is in progress. Site visits were limited during the month due to non-use of siphons. Portable meter testing is scheduled to continue during the irrigation season.

Site visits were conducted on Bacon Island on 6/14/19 and 6/27/19 to troubleshoot and replace various sensors. Site visits were conducted on Bouldin Island on 6/6/19 and 6/21/19 to continue troubleshooting various sensor related issues including loss of power, corrosion, and communications related issues. The new flow meters recently ordered are in the process of being delivered and installed.

Reclamation District No. 2028 Bacon Island

Issue Tracking Summary

7/3/2019

IssueID	Priority	Report Date	Reporter	Location	Issue Type	Description	Action	Field Notes
6	Medium	10/21/2016	Ralph Heringer	Station 275 @ Pump Station	Broken Equipment	Trash racks in need of maintenance/repair	Investigate	TBD
8	Low	11/2/2016	Dave Forkel	Station 668-702	Encroachment	Eucalyptus trees present a hazard	Investigate	Review, explore removal
36	Low	2/24/2017	Nate Hershey	Station 712	Seepage	Seepage exiting at toe of slope near retaining wall structure.	Monitor	12/4/17 - Area dried up after winter; continue to monitor
43	Medium	4/4/2017	Brian Janowiak	Station 92-93	Seepage	Seepage existing at toe of slope, running across county road		
48	Low	6/14/2017	Dave Forkel	Station 190+00	Vegetation control	CDFW mitigation site shows evidence of arundo mowing.	Investigate	Discuss mitigation requirements.
67	Medium	6/21/2018	Andrew Reece	Station 596+50	Sloughing	Rip rap sliding down slope causing exposure to waterside slope	Monitor	Monitor for right now, repair in the near future.
67.1		6/27/2019						Rip rap placed in issue area.
70	Medium	8/2/2018	Andrew Reece	Station 336	Rodent Activity	Few sinkholes on ws slope approximately 200ft north of siphon.	Monitor	
70.1		6/27/2019						Burrows chased, re-compacted, and filled with AB.
71	Medium	8/30/2018	Michael Nishimura	Around Station 700 near South east corner of island	Rodent Activity	2 large size burrow dens	Investigate	Just down station of Juniors place, mix of rodent burrow and erosion
72	Medium	1/17/2017	Junior	West and North levees	Boil	Numerous locations along west and north levees	Monitor all boil sites; containment berms built on two most severe boils	Continue to monitor; flows seem to have receded or stopped with lower tides
73	Medium	10/21/2016	Ralph Heringer	Station 465 @ Pump Station	Broken Equipment	Trash racks in need of maintenance/repair	Investigate	TBD

Issue Tracking Summary

7/3/2019

IssueID	Priority	Report Date	Reporter	Location	Issue Type	Description	Action	Field Notes
75	Medium	2/15/2019	Mike Kynett	Old River Levee @ 473+00	Erosion	W/s sloughing into crest, 1.5-foot tall head scarp, existing rock slipped	Monitor	
75.1		6/27/2019						Rip rap placed in issue area. Site within Special Projects Area.
76	Medium	2/15/2019	Mike Kynett	Old River Levee @ ~524+00	Erosion	W/s sloughing into crest, 3-foot tall head scarp	Repair	
77	Medium	2/15/2019	Mike Kynett	Old River Levee @ ~530+00	Erosion	W/s sloughing, 3-foot tall vert head scarp, not yet into crest	Monitor	
78	Medium	2/15/2019	Mike Kynett	Sante Fe Cut @ ~678+00	Erosion	W/s sloughing and cracking into crest	Monitor	
79	Medium	2/15/2019	Mike Kynett	Connection Slough Levee @ ~204+00	Erosion	W/s sloughing into crest, 2-foot tall head scarp, existing rock slipped	Repair	
79.1		6/27/2019						Rip rap placed in issue area.
80	Medium	2/15/2019	Mike Kynett	Connection Slough Levee @ ~262+00	Erosion	W/s sloughing	Monitor	
80.1		6/27/2019						Rip rap placed in issue area.
81	Medium	2/15/2019	Mike Kynett	Old River Levee @ ~332+00	Seepage	Report of water exiting levee during high tide	Investigate	
82	Medium	2/15/2019	Mike Kynett	Old River Levee @ ~364+00	Erosion	W/s sloughing into levee crest, 1.5-foot tall scarp	Repair	
82.1		6/27/2019						Rip rap placed in issue area. Site within Special Projects Area.
